

Zyro Dynamics Pvt. Ltd.

Navigate the Future

IT and Data Security Policy

Document Code	ZDL-IT-001
Version	V.03
Effective Date	01 January 2025
Document Owner	IT Infrastructure and Legal Compliance

PURPOSE AND OBJECTIVE

The purpose of this policy is to protect the confidentiality, integrity, and availability of all information assets owned, managed, or processed by Zyro Dynamics Pvt. Ltd. This policy establishes the standards for acceptable use of company IT systems, data, and network infrastructure, and defines the responsibilities of all users in protecting these assets.

SCOPE AND APPLICABILITY

This policy applies to all employees, contractors, interns, vendors, and any third party who accesses Zyro Dynamics systems, networks, or data in any capacity. It covers all company-owned and company-managed IT assets, including laptops, mobile devices, servers, cloud services, email systems, and network infrastructure, regardless of the physical location from which they are accessed.

ACCEPTABLE USE OF IT ASSETS

Company Devices

- Company-issued devices, including laptops, mobile phones, and peripherals, are provided primarily for business use. Incidental personal use during non-business hours is permitted provided it does not interfere with work performance.

- Installing software on a company device without prior approval from the IT team is strictly prohibited. All software requests must be raised through the ZyroDesk helpdesk portal.
- Company devices must not be used to access, download, or store inappropriate content, including adult material, pirated media, or illegal software.
- Any lost or stolen company device must be reported to IT Security immediately at security@zyrodynamics.com so that the device can be remotely wiped and access credentials revoked.

Internet and Network Usage

- Corporate internet access may be used for moderate personal browsing during non-working hours. High-bandwidth streaming, torrenting, and accessing prohibited websites are not permitted at any time on the corporate network.
- All internet traffic on the Zyro Dynamics network is monitored and logged for security and compliance purposes. Employees should have no expectation of personal privacy when using company network resources.
- Accessing company systems over public Wi-Fi is strictly prohibited without an active VPN connection.

PASSWORD AND ACCESS MANAGEMENT

Requirement	Standard
Minimum password length	12 characters
Password complexity	Must contain uppercase letters, lowercase letters, at least one number, and one special character
Password expiry	Every 90 days
Multi-factor authentication (MFA)	Mandatory for all company systems without exception
Password reuse	The last 12 passwords may not be reused
Sharing of credentials	Strictly prohibited; attracts immediate disciplinary action

DATA CLASSIFICATION

All information assets at Zyro Dynamics are classified into one of four levels. Employees must handle information according to its classification level at all times.

Classification	Description	Examples	Handling Requirement
Public	Information approved for external distribution	Product brochures, press releases, job postings	No restriction
Internal	Information for employee use only	Internal memos, org charts, policies	Do not share outside company
Confidential	Sensitive business or customer information	Customer data, financial reports, source code	Encrypted; access-controlled; need-to-know only
Restricted	Highest sensitivity; strictly limited access	Credentials, PII, security configurations, trade secrets	Access only for specifically authorised individuals

REMOTE WORK SECURITY

- VPN must be active at all times when accessing Zyro Dynamics systems from outside the office network. No exceptions are permitted.
- Home routers must be secured with WPA2 or WPA3 encryption and a strong, unique password.
- Screen lock must activate automatically after a maximum of 5 minutes of inactivity on any company device.
- Confidential documents must not be printed at home, in a co-working space, or in any public environment.
- Zyro Dynamics reserves the right to remotely lock or wipe any company device that is reported stolen, lost, or believed to be compromised, without prior notice.

BRING YOUR OWN DEVICE (BYOD)

Employees who wish to use a personal device to access Zyro Dynamics systems must register the device with the IT team and have the company's Mobile Device Management (MDM) profile installed. Personal devices used for work must comply with all password, encryption, and VPN requirements set out in this policy. The Company reserves the right to remotely wipe company data from any registered personal device.

INCIDENT REPORTING

Any actual or suspected security incident, including data loss, malware infection, phishing, unauthorised access, or device loss, must be reported to the IT Security team without delay at security@zyrodynamics.com. Timely reporting is critical to minimising damage. Employees who fail to report a known or suspected incident may be held accountable for the resulting harm.

Incident Type	Report To	Response Timeline
Phishing or suspicious email	security@zyrodynamics.com	Immediately
Malware or suspicious device behaviour	IT Helpdesk and IT Security	Within 1 hour
Data breach or suspected leak	CISO, Legal, and HR	Within 2 hours
Lost or stolen device	IT and HR	Within 4 hours
Suspected unauthorised access	IT Security and reporting manager	Immediately
